#### *A Field Guide to Hope*

More and more it seems  
that looming threats are  
underlying our days.

Being up against the giants of climate change, corporate rule, and genetic modification affects everything we do. Yet across the country, and without fanfare, folks are reclaiming biodiversity, local food, and community. Janisse offers stories of big movements and little, individuals and towns, to remind us why we're doing this important work and inspire us that we're not alone. When we hear real-life stories, whether of success or failure, they are a powerful and profound guide to help us gather strength and carry on renewed. Join us for this artful convergence of life, truth, and community as we remember together how to give thanks.
