## Help Organic Farmers & Gardeners Get Their Start!

### You Can Help Increase Access to Organic Education with a Donation to OGS

Dear Organic Grower,

I believe that everyone deserves the chance to learn about sustainable agriculture and organic gardening. I'm writing to you because I know you share my commitment to organic growing, and I want to ask you to join me in making organic education available to more growers.

You and I are fortunate to be part of the Organic Growers School community – a network of people working to educate ourselves and each other about organic growing. We need your help to open the doors of that community to more farmers and gardeners.

Organic Growers School has been on the front lines of the food movement for two decades – bringing people together to share skills and information to transform our lives, our communities, and our food systems. Now OGS is asking for your help to take this work to the next level.

**OGS needs your help now to make sure that everyone who wants to learn about organic gardening and sustainable farming has a chance to participate in our programs.**

**We need your help to educate more farmers and gardeners, to expand our educational content, and to sustain our year-round educational work.**

This year, OGS will be expanding options for commercial farmers at our Spring Conference, adding content developed by and for urban gardeners, and making scholarships available to more low-income gardeners and farmers than ever before.

## How You Can Help

Help Organic Growers School make organic education accessible to all.

**Your gift will help us reach our goal of raising \$3,000 by December 15** to expand OGS's farmer and gardener education efforts and provide scholarships to the Spring Conference.

**Watch OGS's new video and learn more** on Organic Growers School's Indiegogo page.

**Make a contribution.** Help OGS provide more classes and workshops to

farmers and gardeners and expand access to organic education for low-income farmers and gardeners.

**Share on Facebook**

**Share on Twitter**

With your support:

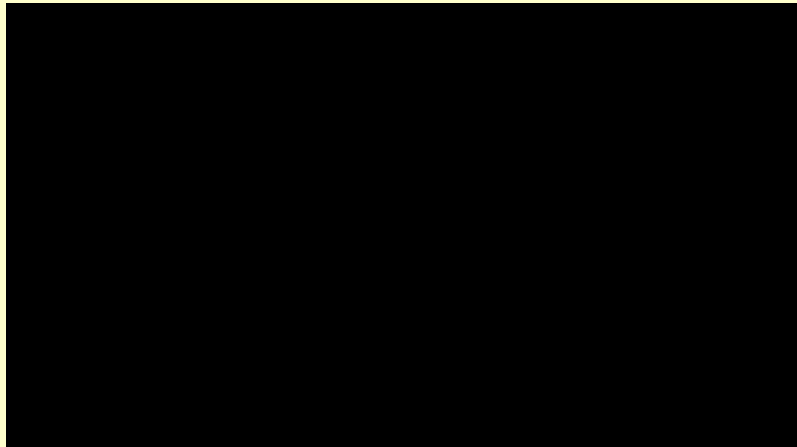

- The Spring Conference will feature 8-16 workshops for farmers (as opposed to the usual 4). These new classes have the potential to reach 300-600 growers at the 2013 Conference alone.
- OGS will partner with urban gardeners in public housing and other low-income neighborhoods to develop gardening classes focused on the unique challenges and opportunities of urban gardening.
- OGS's CRAFT Farmer Education Program will offer five winter farmer roundtables, providing educational opportunities and peer support as farmers plan for the upcoming growing season.

**OGS needs to raise \$3,000 in the next 12 days to support this work. Can you help?**

Your gift will help the Organic Growers School provide affordable, accessible, practical organic education to more farmers and gardeners.

Can you help farmers and gardeners by making a donation today? And help us reach our \$3,000 goal by forwarding this email to a friend, sharing on Facebook or Twitter, and spreading the word to your friends and family.

Make sure to watch the new Organic Growers School video featuring local farmers and gardeners, and find out more by clicking here.

Thank you in advance for your support of this effort to expand the Organic Growers School community.

In appreciation,

Beth Trigg  
Organic Growers School

PS: Your donation in the next 12 days helps OGS provide organic education to more farmers and gardeners! Click here to watch a video about OGS's work and find out how you can help! Thank you!
