

## **Finding Farm Education Opportunities**

*A worksheet to help you find the right farm for you*

### **Big Questions**

What do you want to farm (i.e. vegetables, dairy, meat, eggs)?

Do you have a farming philosophy (i.e. specific land management methods, growing for low-income families, etc.)?

Where do you want to farm?

### **Other Considerations**

What sort of educational experience are you looking for?

Do you have any time or location constraints?

What are your current physical capabilities? (You'll be asked this on your interview.)

Do you want to live on-farm? If so, what do you need to be comfortable (i.e. running water, separation from the farmhouse, etc.)

If you are interning, what kind of stipend do you need to cover your major expenses?
